#AAPM&R20 EXHIBITOR LISTING

ELSEVIER

Elsevier is a world-leading provider of medical books and reference materials, empowering medical professionals to make better decisions, and deliver better care.

ENCOMPASS HEALTH

Encompass Health is the largest owner and operators of inpatient rehabilitation hospitals in the U.S. with 136 hospitals located across 35 states and Puerto Rico. Learn more about our independent practice physician opportunities by chatting with a recruiter at our virtual booth or checking out our available job opportunities on the AAPMR Job Board: ehc.careers/pmr.

ENEMEEZ - ALLIANCE LABS

Alliance Labs has worked with top CARF, VA and Model SCI System facilities for over seventeen years, assisting them in improvement measures for inpatient bowel care protocols. Working with these facilities, we understand the importance of an improved bowel care regimen that can provide more predictability on timing of evacuation and minimize the secondary effect of fecal incontinence. Enemeez®, 5-ml mini enema, is effective for bowel care needs associated with spinal cord injury or disease and general constipation. Adults and children 12 years of age and older (with adult supervision) can use one to three units daily.

FARR HEALTHCARE

Farr Healthcare, Inc. is a physician recruitment firm that specializes in psychiatry recruitment. It has recruited psychiatrists for 25+ years, with a career in physician recruitment of 40+ years. In the past, Linda Farr was the Director of Psychiatry Recruitment for the nation's largest rehab provider. We attend the annual AAPMR meetings and speak to residents at their programs throughout the year. She had the honor of being the only physician recruiter to speak at the last two AAPMR meetings. Many employers only use our services for their recruitment. Farr Healthcare is known for its honesty, reliability and effectiveness.

FLOWONIX

Flowonix Medical Inc. is committed to working with healthcare professionals to enhance patients' lives through targeted drug delivery innovation and therapy advancements. Founded in 2005, our work aims to provide physicians an optimal solution for the treatment of numerous neurological disorders, helping their patients improve their overall quality of living.

FOUNDATION FOR PHYSICAL MEDICINE & REHABILITATION

According to the CDC, one in four people in the US are living with a disability. The Foundation for PM&R funds psychiatric research to increase our understanding of the underlying mechanisms of disability, and determine the best interventions to maximize health and improve function for people with disabilities. Our support gives bright new investigators the start that they need to launch a research career, and provides vital pilot funding for proven investigators to pursue a new line of research or obtain grants to pursue larger-scale research projects. Foundation-funded research has led to hundreds of published articles and medical presentations that educate physicians on the best care for individuals with disability, as well as six times as much funding for physiatrist research.

FUJIFILM SONOSITE

FUJIFILM SonoSite, Inc., the world leader in point-of-care ultrasound, delivers solutions that meet your imaging needs.

GREENWICH BIOSCIENCES

SHEPHERD CENTER

Shepherd Center, located in Atlanta, Georgia, is a private, not-for-profit hospital specializing in medical treatment, research and rehabilitation for people with spinal cord injury, brain injury, stroke, multiple sclerosis, spine and chronic pain, and other neuromuscular conditions.

SHIRLEY RYAN ABILITY LAB

Shirley Ryan AbilityLab is the global leader in physical medicine and rehabilitation for adults and children with the most severe, complex conditions — from traumatic brain and spinal cord injury to stroke, amputation and cancer-related impairment. The quality of its care and research has led to the designation of “No. 1 Rehabilitation Hospital in America” by U.S. News and World Report every year since 1991. Shirley Ryan AbilityLab is the first-ever “translational” research hospital in which clinicians, scientists, innovators and technologists work together in the same space, surrounding patients, discovering new approaches and applying (or “translating”) research real time. This unique model enables patients to have 24/7 access to the brightest minds, the latest research and the best opportunity for recovery.

#AAPM&R20 EXHIBITOR LISTING

SPAULDING REHABILITATION

Spaulding Rehabilitation Hospital is the only rehabilitation hospital in New England continuously ranked since 1995 by U.S. News and World Report in its “Best Hospital” survey. Spaulding is the home of scientific, clinical and translational research for the Harvard Medical School Department of Physical Medicine and Rehabilitation (PMR).

Spaulding is a leader in providing high-quality, patient-centered, post-acute care with value-based outcomes. Spaulding physicians also deliver clinical care at several other Harvard-affiliated institutions, including Massachusetts General Hospital and Brigham and Women’s Hospital. Spaulding is one of only two hospitals in the nation that has achieved the distinction as a Model System in all three areas – burn injury, spinal cord injury, and traumatic brain injury - from the National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR).

Spaulding provides specialized rehabilitation care through programs and centers such as the Disorders of Consciousness Program, Spaulding Stroke Research and Recovery Institute, Spaulding National Running Center, Gordon Center for the Cure and Treatment of Paralysis and Spaulding Adaptive Sports Program. The Department’s accredited PMR residency program has been ranked by Doximity as one of the best in the country. Spaulding also offers Fellowships in brain injury, spinal cord injury and sports medicine rehabilitation.

SPR THERAPEUTICS INC

The SPRINT® PNS System, by SPR® Therapeutics, marks an innovative shift in the treatment of pain. Our breakthrough, restorative, 60-day treatment is a First-Line™ PNS option uniquely designed to recondition the central nervous system to provide significant and sustained relief from chronic pain — without a permanent implant, nerve damage or the risk of addiction. The system has been studied extensively for low back pain, shoulder pain, post-amputation pain, and chronic and acute post-operative pain, and is cleared for use up to 60 days. Recognized by leading pain management centers, the breakthrough neuromodulation treatment offers a patient-preferred alternative to more invasive options.
