

# aapm&r Registry

## Patient Reported Outcomes Module

Your doctor is using an online survey to collect important information about your care. This survey is a part of the American Academy of Physical Medicine and Rehabilitation's Registry. Your answers will inform your treatment as well as the treatment for other patients like you. These questions will be used to follow your progress during the course of your care.

You will receive follow-up surveys sent to your email. It is very important for you to take a few minutes to fill-out these surveys as well.

The goal of this survey is to inform both you and your doctor of pain, quality-of-life, goals and additional information. The survey is using PROMIS®-29, a tool that is used by many doctors like yours, asking questions over 8 topics:

- |   |   |
|---|---|
| <input checked="" type="checkbox"/> Physical Function | <input checked="" type="checkbox"/> Sleep Disturbance                                     |
| <input checked="" type="checkbox"/> Anxiety           | <input checked="" type="checkbox"/> Ability to Participate in Social Roles and Activities |
| <input checked="" type="checkbox"/> Depression        | <input checked="" type="checkbox"/> Pain Interference                                     |
| <input checked="" type="checkbox"/> Fatigue           | <input checked="" type="checkbox"/> Pain Intensity  |

Thank you for taking the time to answer these important questions. Talk to your doctor to learn more about this survey!

The American Academy of Physical Medicine and Rehabilitation (AAPM&R) is the national medical specialty organization representing more than 9,000 physicians who are specialists in physical medicine and rehabilitation (PM&R). In order to fulfill the vision of the Academy and our membership, AAPM&R built a clinical data registry.

- Physiatrists are the essential medical experts in value-based evaluation, diagnosis, and management of neuromusculoskeletal and disabling conditions.
- Physiatrists are indispensable leaders in directing rehabilitation and recovery, and in preventing injury and disease.
- Physiatrists are vital in optimizing outcomes and function early and throughout the continuum of patient care.

AAPM&R's Registry is a single repository of data which will aid the specialty by guiding efforts to reduce burnout, defend scope of practice, demonstrate value and provide data to improve patient care.
